## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

1. The terminal disclaimer filed on 6/30/2009, disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of the copending Application No. 10/580,364 has been reviewed and is accepted. The terminal disclaimer has been recorded. Therefore, the obviousness-type double patenting rejection of instant Claims 34-38 provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-4 and 6-9 of copending Application No. 10/580,364 ('364), of record is overcome. Therefore, this obviousness-type double patenting rejection is withdrawn.

2. The rejection of Claims 35-36 under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the regeneration of axons on retinal ganglion cells by administration of mannose and forskolin, does not reasonably provide enablement for the regeneration of neurons using a combination of D-mannose and all the modulators as broadly claimed in instant claims 35-36, has been overcome by amendment. Claim 35 has been amended to recite forskolin as the specific cAMP modulator. Claim 36 has been cancelled.

3. The closest prior art of record, Ferguson (GB 2299025; cited in IDS of 9/11/2008) teaches the use of mannose 1- and 6-phosphate for the treatment of fibrotic disorders and prevention of scar formation. It does not teach or render obvious the use of D-mannose or the combination of D-mannose with forskolin, oncomodulin or TGF- $\beta$  for promoting neuronal outgrowth in the retina as instantly claimed.
